PROJECT

Data Analysis Project using Excel & R programming

- Worked with real-world datasets to clean, manipulate, and analysis data using **Excel** and **R programming**.
- Visualized key insights using **R's ggplot2** library to create informative charts (e.g., bar plots, scatter plots) for better data interpretation.
- Developed summary reports with key findings, presenting data-driven recommendations.
- Used Excel as a helping tool and as a complementary tool while analysis

Attendance System

Full-Stack Web Application | React, Django, MySQL, JWT, REST API, Tailwind, Axios | 2025

- Built a full-stack attendance system for a law college using **React (frontend)** and **Django REST API (backend)** with **JWT authentication** and **role-based access** for admins, faculty.
- Designed a normalized **MySQL schema** supporting **multi-program, multi-section** law courses
- enabled auto-start with **Windows scripts** for **local LAN** deployment.
